Comments

In our own sailboat I have together with my boyfriend sailed around the world. The voyage starts from Oslo in 2005 and we have so far sailed more than 50 000nm. During our voyage with SY Empire I have given birth to two sons born in 2009 and 2010 in Australia.

To experience the world from a sailboat involve much more than just sailing. A long sailing voyage provides a good basis to develop personal qualities like endurance, planning, cooperation, problem solving and improvisation. In addition to experience and knowledge about sailing you get a good view of different cultures, traditions and architecture around the world.

During our voyage I have also created my own jeweler collection, *HeiDesign*, with black pearls from the Tuamotos in combination with silver and leather.

Key Qualifications

I have experience as project architect and interior designer. At The Oslo School of Architecture & Design I have been teaching and planning the studies for first year students. I have worked with both small and big projects ranging from housing, bridges, hotel- and office buildings as well as public spaces and cabins on large cruise ships. I have participated in architect competitions both at work and on my spare time with friends. I have done several building reports and I am familiar with communicating with the Norwegian Plan and Building Department. I also have understanding of how to run a small architectural office.

I am enthusiastic, resourceful, curious and responsible about my job. I work efficient and communicate well. I like being part of a team but can also perform on my own.

Computer

I am familiar with Autocad on PC, but I have knowledge about MAC, 3d Studio, Form-Z and VectorWorks. I also use Photoshop, Illustrator and Dreamweaver (web design)

Publications

SEILAS – series of articles from the voyage from 2005 and still writing, 9 issues a year.

ARC Cruising Magazine, Sailing in Brazils & Sailing Patagonia

Byggekunst (Building Art) - Student project
